ANURAG KUMAR

INDEPENDENT SOFTWARE BUILDER | WEB & AI PRODUCTS

Chakia, Bihar, India | anuragkumarb3@gmail.com | github.com/anuragkumarb3-oss

PROFILE

Independent software builder with 3+ years of self-directed learning and hands-on project work. Builds websites, web apps and AI-powered tools. Comfortable working on both the user-facing side of an app and the behind-the-scenes systems that handle data, APIs and automation.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, HTML, CSS
Web & Mobile: React, Next.js, React Native, Expo, Expo Go
Backend & Databases: FastAPI, Flask, Express, PostgreSQL, SQLAlchemy, Supabase
AI & Integrations: Google Gemini API, MCP, Playwright, OAuth, REST APIs
Cloud & Tools: AWS (hosting & deployment), Linux, Docker Compose, Git, GitHub, Terraform
Design & Product: Figma (UI/UX design and prototyping), user flows, MVP planning, market research

WHAT I CAN BUILD

- Mobile-friendly websites and web apps for businesses and new products.
- App features such as user accounts, databases, forms and order workflows.
- AI features that connect applications to language models and external tools.
- Automations that connect services and reduce repetitive manual work.

SELECTED PROJECTS

Phoenix | WhatsApp-First Personal AI Assistant

Python | FastAPI | React | Node.js | PostgreSQL | Gemini | Playwright | MCP

A personal AI assistant project that connects WhatsApp to useful digital tools. The project is designed with a Python backend, a web dashboard and a WhatsApp connection. Planned tools include web search, browser automation and connections to services such as email, calendar and GitHub.

BlackPhnix Hub | Hosting Services & Automation Platform

Python | Flask | SQLAlchemy | React | CyberPanel API | Gemini

A web portal project for managing hosting-related services. It includes user accounts, domain and service requests, support workflows and an admin area. The backend is designed to automate tasks such as creating websites and managing hosting services through a hosting control panel.

LazyHand | Hyperlocal Commerce & Delivery App

TypeScript | Next.js | React | Expo | Supabase

A marketplace app prototype for connecting local shops with customers in smaller towns. The current prototype covers customer, seller and admin screens, product categories and order flows. Live authentication and full backend order processing are still under development.
